Industrial materials, residue or trash that may have or could come into contact with storm water
Materials are kept either in silos or swept into bins.

Leaks or spills from industrial equipment, drums, barrels, tanks or other containers that have occurred within the past three years
None

Off-site tracking of industrial or waste materials or sediment where vehicles enter or exit the site
None

Tracking or blowing of raw, final, or waste materials from areas of no exposure to exposed areas
None

Evidence of, or the potential for, pollutants entering the drainage system
No

Evidence of pollutants discharging to surface waters at all facility outfalls, and the condition of and around the outfall, including flow dissipation measures to prevent scouring
No

Review of training performed, inspections completed, maintenance performed, quarterly visual examinations, and effective operation of BMPs
Training was performed Dec 2018

Results of both visual and any analytical monitoring done during the past year shall be taken into consideration during the evaluation
N/A

Storm Water Pollution Prevention Plan review: any revisions or updates needed
No

Comments, Findings and Corrective Measures required (if applicable, list deficiencies or areas which require the SWPPP to be revised (revision within 30 days of the inspection) and controls implemented within 60 days of this Inspection). Include date(s) Corrective Measures were achieved for any listed deficiencies.
None

In Compliance with SWPPP?

Yes

How was the site evaluated for unauthorized discharges?

Visual

Outfalls or on-site drainage points that were directly observed during the unauthorized discharge evaluation.

Whole Site

Results of any test and/or evaluation for the presence of unauthorized discharges. List any unauthorized discharges located

None

Actions taken to eliminate unauthorized discharges, if any were identified

N/A
