Stormwater Sampling Documentation
Quarterly Visual Examination of Storm Water Quality
Permit Part II.D

Facility Name: Allied Concrete - Waynesboro
Permit Number: VAG110327
Outfall Number: 001
Sample Location: Outfall

Note: A Measurable Storm Event is an event that results in an actual discharge of the site. It must be at least 72 hours from the last Measurable Storm Event for monitoring. Within 30 minutes (and no later than 60 minutes) from when the discharge begins, collect a representative sample of the stormwater discharge directly into a clean glass container and observe the water’s characteristics in a well lit area.

Visual Quality Observations:

1. Describe the Clarity and Color of the discharge: Clear, Slight Brown (or Gray), Light Brown (or Gray), Turbid Brown (or Gray), Muddy Brown (or Gray), etc.
   - light gray

2. Describe any odor present: None, earthy, musty, petroleum, chemical-like, etc.
   - none

3. Are there any floating solids present? If so describe: plastic or paper trash, wood chips, grass, etc.
   - yes (1)

4. Are there any settled solids present after 30 minutes settling time? If so describe: 5%, 10%, 25%, 50% of sampling container full of solids.
   - minor trace only

5. Is there any foam present at the discharge outfall? If so describe color and extent of coverage.
   - none

6. Is there an oil sheen (‘rainbow’ hue) present?
   - none

7. Are there any other indicators of Storm Water pollution?
   - none

Visual quality of the receiving stream (include observations for any solids deposition or oil sheen from industrial activity): no solids; no sheen

Comments and/or corrective actions taken (explain). Include probable sources for any noted indicators of storm water pollution. If no sample was possible during a quarter, include documentation explaining why a sample was not possible (including dates/times the outfall was viewed and/or sampling was attempted as well as rainfall data such as local weather station data, facility rain logs, etc.)

brief thunderstorm producing quick runoff
lot was swept with vacuum truck the previous day
annual sample taken

(1) floating solids included sycamore tree seeds, other flowering tree debris, and tree pollen

Certiﬁy under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure accuracy and completeness. Based on my knowledge of the person or persons who manage the system or those persons directly responsible for gathering the information. The information submitted is to the best of my knowledge and belief true, accurate and complete. I am aware that there are signiﬁcant penalties for submitting false information, including the possibility of ﬁnes and imprisonment for knowing violations.
